Light Grey - Solar

Sand - Solar

Our unique end stands are available in a selection of modern neutral colours to compliment any outdoor setting.

White - Electric

Anthracite - Electric

Light Grey - Electric

Sand - Electric

# SLAT OPTIONS

HeatForm offers 2 different slat types, the standard profile 60x14mm with 3 closed air chambers and the premium profile 67,5x16,5mm with 4 closed air chambers. The standard profile is available in PVC and polycarbonate. The premium profile is exclusively available in PC solar and aluminum look.

A high quality pool cover slat is characterized by its lifespan. The wall thickness of the profile is directly linked to the sustainability of the slat. Furthermore the quality of the raw material is decisive as well as the shape of the profile. The design of the slat determines to a large extent the stiffness and resistance to shock of the pool cover profile.

## INSULATION VALUES OF THE HEATFORM SLATS:

- Standard profile 60x14mm :  $U = 4.55 \text{ W/m}^2\text{K}$
- Standard profile 67.5x16.5mm :  $U = 3.80 \text{ W/m}^2\text{K}$

End Stand Dimensions

“The Wave was born out of a desire to create a pool cover which was not only robust and reliable but also looked good. We wanted to create something which finished the pool off nicely but didn’t distract from the overall aesthetic. A finishing touch, a final flourish, if you will. The options for integrated lights and music bring an element of playfulness and as with all our HeatForm products, the solar option offers cost savings and energy efficiency”
